This room contains three circular glyphs, drawn upon the floor in red and white chalk. Magical symbols fill the circles and dark scorch marks from flame can be seen throughout this area. Deep scratches are seen on the floor and on the walls; something would have to be very strong to damage the walls so badly. Blue light filters through from the claw marks. Each flat wall has a door. Spiral stairs tucked into the corner of this room lead downward into darkness.

Any character proficient in Arcana recognizes the symbols as demonic. A successful DC 17 Arcana check reveals their function. If any intelligent creature sets foot in the circles, a portal activates, conjuring a rock demon named "Beshablababa" into another circle and his 2 shadow demon servants into the third. Beshablababa is one of many demons that Setzer now communes with, although it has been quite some time since Setzer has been in this part of the tower. The demons attack other creatures, assuming them to be intruders. The conjuring lasts for 1 hour. Thereafter, the circles can't conjure demons until the next sunset. If Beshablababa is dead when the circle is activated, it summons a random hostile wrock but not shadow demons. The chalk is unburned by fire. Rubbing it out by hand activates the circle unless that hand is doused in holy water, but always prevents it from being used thereafter. Pouring at least 10 gallons of water next to the circles washes away the chalk without conjuring anything. A subsequent successful DC 17 Arcana or Investigation check deduces one of these solutions.

Cellar

After descending the spiral stairs, you arrive in a massive circular room beneath the tower. Against the wall on all sides, like the end of spokes in a wheel, are seven circular stone desks, each with the statue of a human man in wizard robes upon it. Every statue is slightly different in appearance although most have a similar face: a man with a sharp nose and long, flowing hair, the robes which seem to blow in the wind. He stands with arms outstretched in keen concentration.
