
Orcad 16.6-torrent.rar

May 6, 2017 Dec 23, 2016 Dec 23, 2016 Cadence Design Systems, Inc., a leader in global electronic design innovation, released Cadence OrCAD Capture 16.6, which includes new . Dec 31, 2016 How do I find out which version of Orcad I have installed? The version stated in the about box of the customerise menu doesnt seem to be correct.

Introduction
===== Ophthalmologic and neurological diseases are considered among the most common comorbidities that require surgery in older people. Despite this, little is known about comorbidities and how they affect the outcome of surgery in this population. **Aims and objectives** ===== The objective of this study is to establish the prevalence of pre-existing ophthalmological diseases and neurological disease among the population of patients aged ≥ 75 years who undergo surgery of the hip or knee. **Methods** ===== This is a retrospective study of patients older than 75 years, who underwent hip or knee arthroplasty over a period of 2 years. Demographic and clinical data were obtained from the medical files and pre-surgical anamnesis. **Results** ===== 64 patients (mean age 83.7 ± 5.9 years) were included. The male to female ratio was 55/9. Anterior knee osteoarthritis was the most common indication for surgery. The most common concomitant diseases were hypertension, diabetes, dyslipidemia, depression and osteoporosis. One patient had prior myocardial infarction. Prior ophthalmologic surgery was reported by 8 patients. One patient had a prior ocular surgery. In the preoperative clinical examination, only 1 eye of the 5 patients with exudative age-related macular degeneration was blind, 2 eyes had visual acuity at 2/60 and 3 eyes had visual acuity of $\leq 1/60$. **Discussion** ===== The prevalence of ophthalmological disease increases with age. Visual impairment is multifactorial and may include systemic and ocular comorbidities. There is paucity of data on comorbidities and ophthalmological disease among patients over 75 years who undergo surgery. The results of this study suggest that ophthalmological disease is not an exclusion criterion for joint

replacement surgery. A considerable number of patients had comorbidities; one patient had a prior myocard

Federal prosecutors are weighing whether to indict the former Chicago police sergeant who shot to death a black teenager more than a decade ago. After a trial that ended in a mistrial last year, Officer Jason Van Dyke was sentenced to six years in prison for second-degree murder. At a hearing last week, prosecutors asked for a 90-day extension of the deadline for Van Dyke to face charges, citing pending decisions on whether to bring charges against the officer. A decision on whether to bring the case against Van Dyke is expected this week, said a source with knowledge of the matter. The Chicago Tribune previously reported the development. Van Dyke was charged in the 2004 death of 17-year-old Laquan McDonald, who was shot 16 times by the officer within seconds of his arrival at a suburban Chicago police station. Get Breaking News Delivered to Your Inbox Last year, a Cook County judge declared a mistrial after jurors could not reach a unanimous verdict on whether Van Dyke had a fair chance to defend himself. At that trial, an autopsy and video from the shooting appeared to contradict Van Dyke's claim that McDonald was advancing on him with a knife. A federal grand jury also heard evidence in the case and may indict him at any time, sources with knowledge of the investigation have told CBS News. Several of Van Dyke's relatives cried openly in the courtroom last week as he was sentenced. The officer never took the witness stand in either of his trials. In 2011, a jury acquitted another officer, Daniel O'Brien, who had pulled over Van Dyke and McDonald in a squad car. Van Dyke was suspended for eight days for violating department rules after the shooting.

KMEX (105.3 FM, "My Country 105.3") is a radio station broadcasting a mainstream country music format. Licensed to Texico, New Mexico, United States, the station serves northern Texas and southern New Mexico. The station is currently owned by Entravision Communications. History The station was assigned the call sign KAKA on 1991-02-02. On 1995-02-01, the station changed its call sign to KJOE, on 1998-03-01 to KKNT, and on 2003-10-31 to the current KMEX. KMEX was purchased by Entravision Communications from f678ea9f9e
